EDUCATION

Washington University in St. Louis | Bachelor of Computer Science and Mathematics

May 2023

EXPERIENCE

Mastercard - Software Engineer | O' Fallon, MO

August 2023 - Present

- Delivered new Spring Boot API features in a 10-person Agile team, improving digital redemption capabilities.
- Developed features and fixed defects for a continuous delivery platform, which reduced deployment lead time by 86%.
- Drove innovation by developing and presenting 3 proof-of-concept innovation applications to senior leadership.
- Improved test coverage and reliability of RESTful microservices by expanding integration and unit testing (JUnit, Mockito), reducing production defects.

Caralyst Health - Lead Engineer | Remote

November 2022 - May 2024

- Designed and built a full-stack application from scratch, utilizing React, Angular, Node.js, and MySQL, hosted on AWS.
- Collaborated with the CTO to architect and implement cloud-based solutions, ensuring scalability and reliability.
- Developed comprehensive integration tests for server-side code to enhance code quality and reduce deployment risks.
- Mentored and led a team of developers, providing guidance on best practices, code reviews, and project workflows.

Crosswalk Legal

May 2025 - January 2026

- Built a legal document and client management system with real-time sync engine.
- Designed a hybrid local + cloud architecture using PostgreSQL, Express, and webhooks for millisecond-level sync.
- Partnered with company CTO to ship and present a feature heavy MVP in under 4 weeks.

PROJECTS

Repo Magik (Mastercard Internal Application)

December 2023 - Present

- Assisted engineering leadership by developing a full stack (React/TS, Spring, PostgreSQL) to analyze story lead times.
- Parsed and processed data for over 250 repositories spanning the past 3 years to examine lead time trends.
- Presented application features to senior leadership and TPMs, demonstrating key functionalities and driving adoption to support achieving DevOps goals.

LingoLeaf (Independent iOS Application)

December 2025 - Present

- Built an iOS-first language learning app (React Native) combining EPUB reading, translation, and vocabulary learning.
- Built the full stack with Supabase Auth, Postgres, and Row Level Security to support secure user and content workflows.
- Engineered a cache-first translation pipeline reducing API costs and improving lookup speed.
- Shipped monetization and production features including premium entitlements and offline analytics.

Trellis (Independent Desktop Application)

December 2025 - Present

- Built Trellis, a local-first AI knowledge app (Electron, React, TypeScript) where chats persist as structured notes in a user-owned markdown vault.
- Architected hybrid local/cloud system (Electron, SQLite, IPC; Supabase for auth/AI) keeping data local with cloud-backed features.
- Shipped data extraction pipelines with guardrails and full regression/E2E coverage to ensure reliable behavior.

LEADERSHIP EXPERIENCE

President/Treasurer

August 2021 - May 2023

Washington University Powerlifting Team | St. Louis, MO

- Managed a budget of \$30,000 and led a 42 member organization in participation with local events.
- Secured funding via university appeals and established partnerships with gyms and event organizers.

SKILLS

- **Languages:** JavaScript/TypeScript, Java, Python, SQL, C#, C++
- **Frameworks & Tools:** Spring Boot, Node.js, React, Angular, Vue, Express, PostgreSQL, MySQL, MongoDB, AWS, Jenkins, Cloud Foundry, Groovy, GraphQL
- **Additional:** Unit & Integration Testing, CI/CD Automation, AI-assisted development (ChatGPT, Codex, Claude, Cursor), Agile Development, Spanish Proficiency
